

Titan Workspace keeps your documents secure, accessible, and compliant.

Titan Workspace is a suite of document management and productivity solutions designed to simplify how people connect and work in Microsoft 365. Titan Workspace is the only tool you need to make Microsoft 365 work for all business users without spending a fortune on SharePoint custom development. Titan Workspace is ready “out of the box” to deliver secure and collaborative solutions on your M365 platform and inside Microsoft Teams

Key Benefits

Here are some of the key benefits of a document management system that may inspire you.

Easy-to-apply Document Permissions

Easily manage document security, restrictions, and approvals without learning SharePoint. Adoption and accessibility by all users make it more secure across the entire M365 ecosystem (Teams, Project, DMS).

Document Approval

Easy file-sharing with both internal and external users means all parties approve documents faster and speed up workflows.

Ensure Compliance

Tracking document compliance and enforcing it is easy for HR or legal. Titan Document Management allows you to see whether employees have read and accepted documents.

Offline Working

Your Teams, Projects and Department documents available in your local drive.
