

Property Management Portal

Collaboration portal for property management companies.

Designed for Office365 and SharePoint

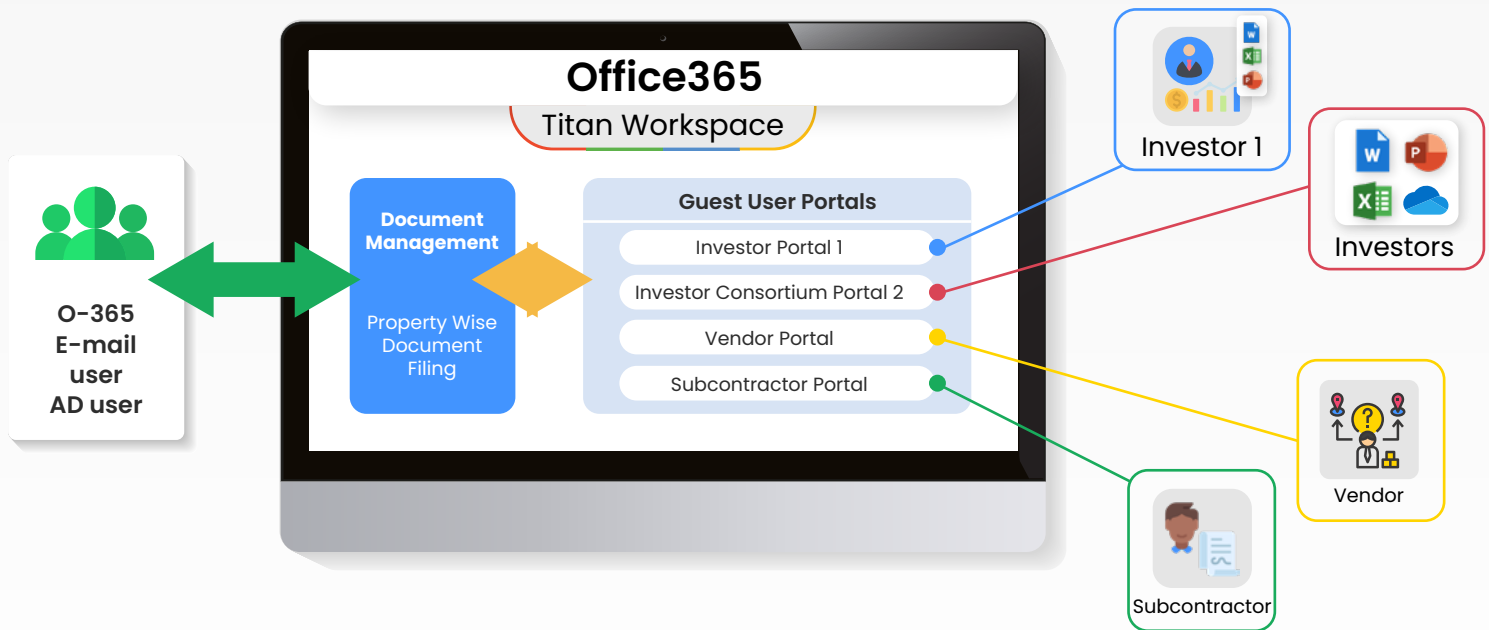

Property management companies find it to be a challenge to share documents, reports, financial statements, and information with Investors securely. Titan Workspace solves this problem with the help of a document management system that not only streamlines internal document controls, but also extends a secure portal to investors allowing them secure access to all documents and information.

Investor reporting Portal

Delivers a faster, more secure way to share monthly reports or sensitive information with investors, limited partners, or other external key stakeholders for reporting needs, all accessible from a single portal.

- ✓ Investors can access information organized by property
- ✓ Read, Edit, Download or Print restrictions can be applied on shared documents
- ✓ Document version control and access.
- ✓ Property based document filing.
- ✓ Alerts and notifications for all collaborators.
- ✓ Investors need not to have Office365 account or license.
- ✓ Eliminate email attachments by sharing in Investor Portal.

Document Management

Easily set up document repositories and apply permissions, security, and restrictions. Securely and efficiently share any document with Investors or external stakeholders. Eliminate the costs of third-party document and e-signing tools. Titan Workspace leverages SharePoint and delivers a seamless user experience within Microsoft Teams.

- ✓ Property based repositories (residential, commercial, industrial properties)
- ✓ Property based user access permissions
- ✓ Users can select specific documents to be shared with Investors
- ✓ Document version control and retention policies
- ✓ Document approvals between management company and Investors through portal
- ✓ Track shared documents and invoke Investor's access if needed
- ✓ E-signatures service included in subscription

“We have extended portals to our investors so that they can access important reports and documents 24x7. Titan Workspace has reduced our document sharing pain.”

Leading US Property Management Company

Workflows and Approvals

Property management company and investors frequently require approval processes that are efficient and secure. Titan Workspace allows you to create approval workflows which include internal user and external stakeholders in a variety of approval processes.

Some of these examples are:

- ✓ Document approval workflows
- ✓ Budget approvals
- ✓ Purchase request
- ✓ Expense approvals

Titan Workspace automates business processes with the help of Low-Code/No-Code workflow automation tool that leverages Power Platform to handle complex and cross functional processes.
